- **DBMS:** Oracle, MS Sql Server, MySql, PostgreSQL, Firebird, MongoDB
- **Application server:** Nginx, Tomcat, Jboss
- **Source management:** Git, Svn
- **Project management:** Hudson, trac, redmine
- **Build automation:** Jenkins, Maven
- **Tools:** PyCharm, Eclipse
- **OS:** MS Windows, Linux, OS X

## EXPERIENCE

(March 2014 – present)

### Senior Software Engineer NiviGroup S.p.A - Florence, IT

Developed several python-based projects based on a proprietary framework for large touchscreen devices. The software helps to control and interact with a natural interface with a large number of controllers and input.

Developed a web-based platform (Django) with the purpose of having a single application to help customers to obtain business information about other companies or individuals.

(May 2012 – Jan 2014)

### J2EE Senior Developer Engineering S.p.A - Florence, IT

Collaborated on a project called "Areas," which is a modular ERP suite for the management of public health structures. The suite is a modular-based software that is usable by a web interface and is invoked by web services (SOA).

The use of this software is very broad and covers the following areas: payment of health services, first aid, operating theatres and personnel management.

(Jun 2011 – May 2012)

## **J2EE Senior Developer**

[Monte dei Paschi di Siena S.p.A – Siena, IT](#)

Collaborated on a project called “PaschiFace,” a web platform for bank operations. Specifically, I developed the mass production of PDFs for the documents “Delega f24” and “Quietanza F24.”

These services were exposed through the use of EJB (3.0). The process was scheduled in batch and ended with the mass production of PDF stored in a documental ERP suite.

(Oct 2009 – Jan 2011)

## **J2EE junior / PHP Developer**

[Infocube S.r.l – Naples, IT](#)

Developed several web-based projects, the highlight being for Ansaldo S.p.A. This software was used to keep track of the establishment of new train stations (materials, costs etc.).

(Sep 2008 – Oct 2009)

## **J2DK junior developer / PHP**

[Engineering S.a.s – Naples, IT](#)

Collaborated on a CRM software utilized by a call center that was developed using Java/Swing integrating Asterisk PBX VoIP.

(May 2008 – Sep 2008)

## **J2DK developer**

[Tributaria Italia S.p.A – Naples, IT](#)

Developed a client/server Java desktop application used by public administration for the calculation of wasted taxes.

(Jan 2005 – Oct 2007)

## **PHP Developer**

[Muir & Associates Inc – Jacksonville, Florida US](#)

Developed a platform for a credit recovery service that was used by customers to sign in to personal services and procure payments online, and by the owners to monitor clients and credit services.

(Mar 2005 – Sep 2006)

## **PHP Developer**

[Servizi Aziendali S.r.l – Naples, IT](#)

Designed a web platform for the release of company proprietary software. This restricted-access platform had multiple roles, such as email update notifications sent to customers and prompts to download software updates.

## EDUCATION

(2002 – )

### **Bachelor Of Science**

[Università federico II, Naples, IT - Computer Science](#)

Courses in programming languages, math, statistic, parallel computing etc.

(1997 - 2002)

### **Diploma**

[Scientific High School](#)
